Oyuki Ogawa

Executive Vice President and Member, Board of Directors, DENSO Corporation

Oyuki Ogawa is Executive Vice President in charge of the Engineering Research & Development Center of DENSO Corporation in Kariya, Aichi, Japan.

After earning a Bachelor of Science in Mechanical Engineering degree from Tohoku University in March 1967, Ogawa joined DENSO Corporation (formerly Nippondenso Co. Ltd.) in June of that year.

Ogawa began his career in the Fuel Management Components Division focusing on the development of fuel pump products. Under strict environmental regulations, he developed DENSO's first mass-produced fuel injection system.

His accomplishments led to a promotion to General Manager of the Engine Control Components Engineering Department in 1989. In 1996, he was appointed to the Board where he was responsible for all of DENSO's engine management products. In 2000, he was promoted to Managing Director responsible for the entire Powertrain Product Group and in June 2004, promoted to Senior Managing Director. In June 2006, he was promoted to Executive Vice President.

Outside DENSO, Ogawa serves as a Director of the Society of Automotive Engineers of Japan, Inc. In May 2002, he received an award for the development of the Long-life Spark Plug Iridium Saver for Gas Engines at the 52nd Annual Society of Automotive Engineers of Japan congress. He is also a Trustee of The Japan Society of Mechanical Engineers.

DENSO, a leading global supplier of advanced automotive technology, systems and components, employs approximately 112,000 people in 32 countries and regions, including Japan. Consolidated global sales for the fiscal year ended March 31, 2007 totaled US\$ 30.6 million.
