

Automotive Cyber Security Summit West 2015

Roger Berg, vice president North America Research and Development, DIAM, will lead a roundtable discussion titled Examining Cyber Security Implementation at the R&D Level & the Business Implications for OEMs at 2 p.m. on October 6 at Automotive Cyber Security Summit West 2015. The session will debate the implications and execution of cyber security at the earliest stage of vehicle design strategy and learn how the OEM business model stands to be affected.

The OEMs, tier 1 manufacturers, government representatives, academia and industry service providers in automotive cyber security attend Automotive Cyber Security Summit West 2015 to learn about advances in technology, engineering challenges and solutions to security vulnerabilities, as well as security use cases from the US, Europe & Asian OEM's, Tier 1 suppliers and leading cyber security technology firms.
