

CORNER CLEARANCE CAMERA

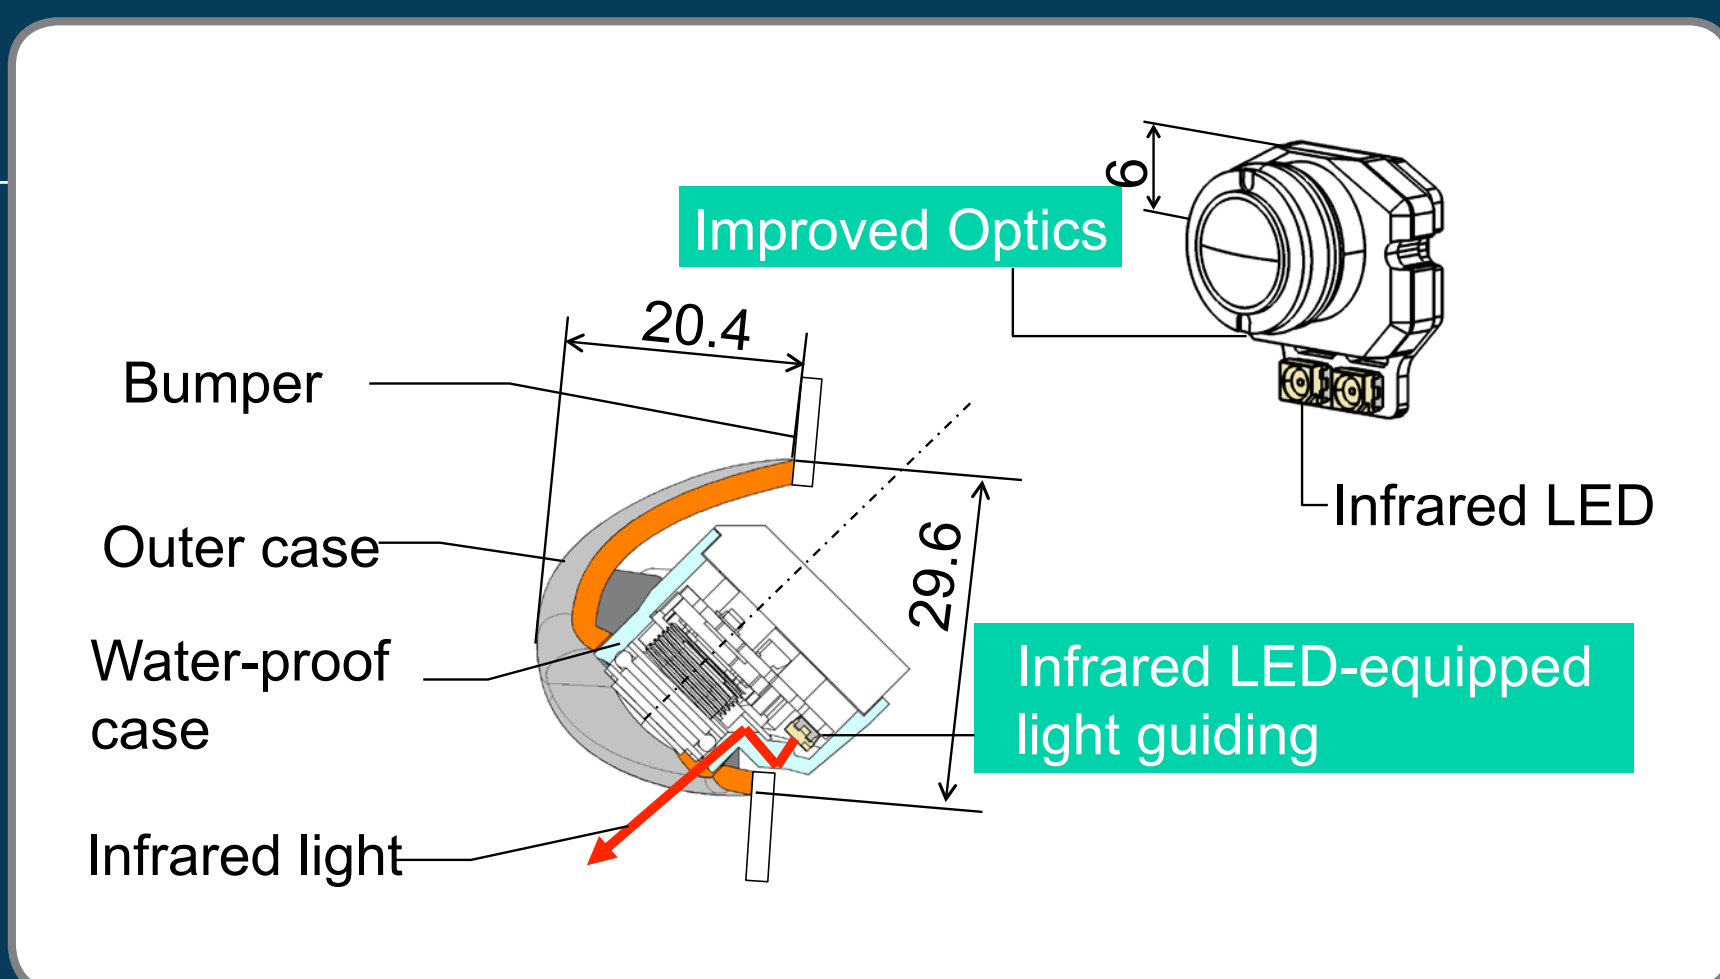

Getting in and out of tight parking spots is always a challenge. DENSO makes it easier with an add-on corner bumper camera accessory.

Manufactured to automotive grade standards, the corner clearance camera provides all weather, daytime and nighttime visibility at one of the hardest places to see when parking—the front corner of the bumper. Video is transmitted in real-time directly to your in-vehicle display, providing a clear view of how much clearance is available.

What it does:

- ✔ Provides a clear view of the corner bumper area
- ✔ Real-time video shown on in-vehicle display
- ✔ Improves maneuvering visibility in tight areas

How it works:
