

# DENSO

## LED PLASMA CLUSTER

For most, a car is like a second home. Our family and friends come and go, the family dog jumps in from time to time – we travel near and far to work and play. With all of life's happenings – our furry friends, children's soccer games, road trips and fun, comes the mud, dust, dirt, allergies and odors.

We want to keep your second home safe, clean and comfortable. Our goal is to provide an enjoyable driving experience while taking care of the people you care about most by eliminating the harmful particles, aggravating allergens and irritating odors in your car.

### What it does:

- ✔ Improves air quality in your vehicle, reducing odors and allergens
- ✔ Provides overhead lighting with increased visibility and illumination

### How it works:

- ✔ Positive and negative ions are released into the air
- ✔ Ions work to remove and decompose mold and viruses found in the air

*Protecting lives, preserving the planet and preparing a bright future for generations to come.*
