

## PICOMOBI

Here's a new, environmentally friendly approach to mobility and car sharing in urban environments—PicoMobi. Based on a long history of developing automotive technologies, DENSO offers several solutions for new electric vehicles to improve driver comfort and convenience.

### What it does:

- ✔ Enables car-sharing capabilities for fleet operators
- ✔ Provides A/C seat for driver cooling
- ✔ Provides refrigerated cooling storage to keep cold items cold, such as groceries or medicine

### How it works:

#### Car Sharing System

- Networked on-board hardware to enable one-way car-sharing capabilities
- IC card for vehicle operation (no need for keys)

#### Seat Air Conditioning System

- Cooling seat consumes less energy than traditional air conditioner
- Helps to preserve battery power and maintain driving range

#### Refrigerated Storage

- Integrated high-efficiency cooler for cold storage
- Expands opportunities for fleet operators that require cooled product transport
