

WIRELESS REMOTE CONTROLLER *(PRODUCT CONCEPT ONLY)*

For those instances where your smartphone or tablet is just out of reach, DENSO's new Bluetooth-based wireless remote controller offers a convenient and intuitive way to remotely control your apps from across the table, room or driver's seat. Manufactured to automotive-grade standards, the wireless remote controller provides a simplified interface to make remote app operation easy and seamless.

What it does:

- ✔ Provides wireless remote access to your smartphone or tablet
- ✔ Offers simple and easy 'spin-n-click' hardware interface
- ✔ Extends functionality from the smartphone to in-vehicle displays

How it works:
