

## **Citi Bank Car of the Future Symposium**

### **DENSO Explores V2X and Beyond at the Citi Bank Car of the Future Symposium**

**Doug Patton**, who oversees all North American product engineering and development at DENSO, will explore the future direction of V2X, telematics, Human Machine Interface (HMI) and sensing and their impact on potential opportunities for suppliers. Patton is executive vice president of Engineering, chief technical officer of DENSO International America, Inc. and senior director of DENSO Corp.

Find more information on DENSO's role in autonomous driving and connected vehicle technologies [here](#).
