DENSO Announces Full Acquisition of EASE Simulation, Inc.

— Company brings additional expertise in hardware- and software-based automotive diagnostics to DENSO's OES and aftermarket business operations —

SOUTHFIELD, Mich. – DENSO, the world's second largest mobility supplier, announced today it has acquired EASE Simulation Inc., a company that specializes in automotive diagnostics technology. The company will merge with DENSO Products and Services Americas, Inc., based in Long Beach, Calif., and continue to provide top-quality aftermarket products, services and technology.

As the definition of mobility and transportation continues to change, DENSO is expanding into software-based solutions in addition to its hardware expertise. The full acquisition of EASE enables DENSO to enhance the services offered within its Original Equipment Service (OES), aftermarket and non-automotive businesses.

“EASE excelled in its ability to access and extract enhanced level diagnostics data from vehicles, which is a critical component as we develop and provide more connected services to the aftermarket and OES industry,” said Richard Shiozaki, senior vice president of DENSO Products and Services Americas, Inc. “The company is an important addition to the DENSO family and fits into our long-term goal to create and inspire new value for the future of mobility.”

EASE was founded in 1993 in Scranton, Penn., and its products primarily focus on inspection, diagnostics and emissions, including VehicleMRI®, a precision tool for inspecting and analyzing automotive electronic systems and pinpointing hidden problems beyond typical check-engine-light issues with maximum accuracy. EASE develops automotive diagnostic equipment, automotive inspection software, automotive emissions equipment, and automotive telematics systems. In 2014, DENSO [announced](#) it acquired 72.1 percent of EASE to help accelerate research and development of its vehicle diagnostic and telematics business in North America.

DENSO will move existing EASE employees and their expertise in automotive diagnostics to a business facility in Mayfield, Penn., known as the Northeast Environmental Technology Center.

About DENSO

DENSO is a \$48.1 billion global mobility supplier that develops advanced technology and components for nearly every vehicle make and model on the road today, including Toyota, Honda, FCA, GM, Ford, Volvo, and Mercedes-Benz. With manufacturing at its core, DENSO invests in its 220 facilities in 35 countries to produce thermal, powertrain, mobility, electrification, & electronic systems, to create jobs that directly change how the world moves. The company's 170,000+ employees are paving the way to a mobility future that improves lives, eliminates traffic accidents, and preserves the environment. Globally headquartered in Kariya, Japan, DENSO spent 8.8 percent of its global consolidated sales on research and development in the fiscal year ending March 31, 2018.
