

ITS World Congress 2017

Pat Basset (<http://www.densocorp-na.com/bios/pat-bassett/>), vice president of DENSO's North American Research and Engineering Center located at DENSO International America, Inc. (DIAM) in Southfield, Michigan, will be part of a panel at ITS World Congress talking about the future of mobility and what we expect to see 5-10 years from now. The panel will be during the **Intelligent Vehicle Testing Symposium** on November 1, 2017.

The [ITS World Congress 2017](#) brings together global leaders in intelligent and transformative transportation to showcase and evaluate the latest innovative concepts, active prototypes, and live systems. Academics, researchers, policymakers, businesses, entrepreneurs, investors, implementers, and the media—thousands of people from the transport, automotive, telecommunications, and technology sectors—will engage in robust discussions and spirited debates as to how this rapidly changing and ever-expanding industry is addressing the very real challenges facing our mobile, connected societies today and in the future.
